# Beriko

Literature and resource lists

Fast and easy:

Product description:

What is BeriLo?

- Tool for easy creation and administration of course resource lists

- Offers teachers as well as students a central platform for course resources

- Access to BeriLo via Moodle

Why BeriLo?

Improving teaching & learning

- Facilitates comparison with library holdings
- BeriLo is a multimedia tool and supports the import of external resources (articles, books, videos, aso)
- BeriLo is user-friendly and provides intuitive handling

BeriLo's advantages for teachers

- Fast and easy addition of bibliographical references resp. resources from the university library catalogue and external sources

- Immediate identification of holdings and location of resources in the university library

- Collaborative creation of literature lists

- Enables further use of resource lists already created for future resp. parallel courses

BeriLo's advantages for students

- Immediate access to course-relevant resources

- Overview of holdings and location in the university library

- Immediate access to E-resources

- Enables users to add notes to individual resources and helps create clear structures
